Ronald Amancio

Software Engineer

I am a Full Stack .NET Developer with experience building enterprise-level applications including freight management systems and HR platforms.
My expertise includes .NET, Blazor, SQL Server, and modern frontend development using JavaScript and responsive design principles.
I enjoy building scalable, maintainable systems that solve real business problems.

Education

2003 - 2010
Bachelor of Science in Information Technology

University of Cebu

Expertise

- Enterprise Application Development
- Full-Stack Development
- MVC & Clean Architecture Implementation
- Database Design & Performance Optimization
- Financial Systems Development (Loan & Money Transfer)
- Agile & Structured Development Lifecycle

Tech Stack

Frontend:

- **Blazor Server / Web Assembly**
- **MudBlazor, Bootstrap 5, HMTL/CSS Javascript, Jquery, Ajax**

Backend:

- **ASP.NET Core Web API (.NET 6 / 8), C# .Net, ASP.NET MVC**
- **Entity Framework Core MS SQL Server, MySQL**

Dev Tools & Practices:

- **xUnit, Moq, Integration Testing**
- **Visual Studio, Postman, Swagger**
- **Git & GitHub, GitHub Actions, CI/CD**
- **Agile Methodology (Scrum)**

Language

English

Experience

Sept.2024 - Present
Sharpsuite Coroporate Solutions
Software Engineer

1. Developed a **Freight Management System** (Enterprise Web Application) – Architected and led the development of a scalable freight management platform using **Blazor Web App** (**MudBlazor UI**) and **ASP.NET Core Web API** following clean architecture principles. Designed and implemented RESTful services, JWT-based authentication, carrier-specific business logic (API-integrated and rule-based computation), and repository-pattern data access. Optimized performance, security, and maintainability while integrating multiple freight carriers and managing complex consignment workflows. Leveraged **MySQL** for robust relational data management and ensured production-ready deployment standards.

2. **HR Management Portal** (Enterprise Web Application)
Architected and developed a full-stack HR Management Portal using Blazor Web App with MudBlazor UI framework for a modern, responsive user interface and ASP.NET Core Web API for secure and scalable backend services. Designed RESTful APIs to manage employee records, attendance tracking, payroll components, user roles, and HR workflows while implementing JWT-based authentication and role-based access control. Applied clean architecture principles and repository pattern for maintainability and scalability. Utilized MySQL as the relational database to ensure structured data management, transactional integrity, and optimized query performance for enterprise-level HR operations.

Feb. 2023 - July 2024
TritonTek
Software Engineer

1. Develop Module Part of HRIS(Job Portal) - For Online Employee Recruitment. Frontend using **Blazor(Mudblazor)**, **ASP. Net Core Web API** for Backend.

2. Develop a Third Party Desktop Application for Software Integration for Tekla Structures mainly used for both US Clients. Using C# Application tool with **Entity Framework**, **OOP Structured ORM repository**, LINQ, **Lambda** and it uses **Tekla Open API** and **MySQL** Database. Both Projects are in Agile and Waterfall Methodologies using Sprint.

Feb. 2014 - Jan. 2023
SkyGo Marketing Corporation
Software Developer

1. Develop, Enhanced and Maintain Online Job Exam for Employee Online Recruitment using **PHP Codeigniter**, **Javascript**, **JQuery**.

2. Develop and maintaining a comprehensive ERP system that integrates Sales, Inventory, and Accounting modules to support smooth business operations. This includes building and enhancing features using **C#**, **ASP.NET**, **JavaScript**, **ExtJS**, **JSON**, **jQuery**, and **AJAX** to deliver responsive and user-friendly functionality. You will also work extensively with MS SQL Server, designing optimized databases and writing complex stored procedures to ensure efficient data processing and retrieval. In addition, the position requires troubleshooting system issues, implementing enhancements, and ensuring overall system performance, security, and reliability. Collaboration with cross-functional teams is essential to translate business requirements into technical solutions and deliver continuous improvements to the ERP platform

Oct.2012 - Jan. 2014
MLhuillier Philippines
Programmer / Developer

Develop ML Kwarta Padala (Money Transfer) Application for MLhuilier Partners. Using VB.Net and ASP.Net in FrontEnd and WebServices(SOAP) and MySQL Database for the Backend.

Feb. 2011 - Sept. 2012
Rameses Systems Inc.
Programmer

Develop Loan Application using Java J2EE, Groovy Scripts and MySQL Database.

Apr 2010 - Dec. 2010
Smartminds Systems Inc.
IT Technician

Servicing to Company Client

- Computer Maintenance, Install and Fix (Desktop, Laptop)
- Install CCTV Camera's
- Server Checking and Backup Database for Client
- Network and Troubleshooting
