EDUCATION

- University of Cebu
  Bachelor of Science in Information Technology
  Completed in 2010

EXPERTISE

- Full-Stack Development
- Enterprise Application Development
- MVC & Clean Architecture Implementation
- Database Design & Performance Optimization
- Financial Systems Development (Loan & Money Transfer)
- Agile & Structured Development Lifecycle

TECH STACK

Backend Development

- C#, ASP.NET Core / MVC / Web Forms
- Visual Basic .Net
- Java
- PHP (CodeIgniter)
- REST APIs & Web Services (SOAP, REST)

Frontend Development

- Blazor (MudBlazor)
- React (Currently upskilling)
- HTML, CSS, JavaScript
- jQuery
- Ext JS

PROFILE

Senior Full Stack .NET Developer with strong experience designing and delivering enterprise-grade applications using C#, ASP.NET Core, SQL Server, and modern frontend technologies. Proven ability to build scalable API-driven systems, integrate complex third-party services, and deliver end-to-end solutions with high autonomy.

Experienced across the full development lifecycle—from system architecture and backend services to frontend implementation and deployment. Adept at solving complex problems, optimizing performance, and rapidly shipping production-ready code.

WORK EXPERIENCE

Sharpsuite Corporate Solutions | Software Engineer

September 2024 – Present

- Designed and delivered enterprise-grade applications using C#, ASP.NET Core, and SQL Server, handling full development lifecycle from architecture to deployment.
- Built scalable REST APIs integrating multiple third-party systems (logistics/carrier APIs) with resilient error handling and fallback strategies.
- Architected a dynamic multi-carrier quote system using factory pattern, enabling flexible support for API-driven and rule-based providers.
- Developed a custom HR Portal featuring employee management, task tracking (Kanban-style), and role-based access control to streamline internal operations.
- Implemented secure authentication & authorization (JWT, RBAC) across systems.
- Created responsive, component-based UI using Blazor and MudBlazor, improving usability and performance.
- Optimized database performance through efficient T-SQL queries and indexing strategies.
- Refactored and modernized legacy components for better scalability and maintainability.
- Implemented CI/CD pipelines using GitHub Actions, automating build, test, and deployment processes across environments
- Leveraged AI-assisted tools (ChatGPT, GitHub Copilot) to accelerate development, debugging, and code quality improvements.

KEY PROJECTS

Logistics Quote System

- Multi-carrier API + manual computation engine
- Extensible architecture using design patterns

HR Management Portal

- Employee + task management system (Kanban-style)
- Role-based access and admin/user workflows

Full Stack / Frameworks

- ASP.NET Core (Full Stack Development)
- MVC Architecture
- CodeIgniter (Full Stack PHP Framework)

API & Integration

- RESTful APIs
- SOAP Web Services
- Third-party API Integration

Databases

- Microsoft SQL Server (MSSQL)
- T-SQL (Stored Procedures, Query Optimization)
- MySQL

Reporting Tools

- Crystal Reports
- T-SQL Server Reporting Services (SSRS)
- Jasper Reports
- DevExpress Reports

DevOps & Tools

- GitHub Actions (CI/CD)

Version Control

- GIt
- Torotoise SVN
- Visual SVN

Cloud & Hosting

- Microsoft Azure
- Plesk

Project Management & Collaboration Tools

- Asana
- ClickUp
- Github Projects

TritonTek | Software Engineer

Feb. 2023 - July 2024

1.Develop Part of a module for HRIS Job Portal - For Online employee recruitment with Blazor for Frontend and ASP.Net Core Rest API for Backend.

2. Develop a Third Party Desktop Application for Software Integration for Tekla Structures mainly used for both US Clients. Using C# Application tool with Entity Framework, OOP Structured ORM repository, LINQ, Lambda and it uses Tekla Open API and MySQL Database.

Both Projects are in Agile Methodologies with Sprint, Backlog and Task Tracking

SkyGo Marketing Corporation | FullStack Developer

Feb. 2014 - Jan. 2023

1.Enhanced and Maintain Online Exam Recuitment Project using PHP Codeigniter and MySQL

2.Develop an in-house ERP Project using C# and Asp.Net with Javascript (ExtJs) and MSSQL as Database with SQL Server Reporting Services (SSRS) for Server Side Reporting tool.

MLhuillier Philippines | Programmer / Developer

Oct.2012 - Jan. 2014

Develop ML Kwarta Padala (Money Transfer), using Visual Basic .Net for desktop application with Web Service (SOAP) for data transfer and MySQL as Database and also ASP.Net Web Forms for Online Portal

Rameses Systems Inc | Programmer

Feb. 2011 - Sept. 2012

Develop Loan Application using Java 2EE with MySQL Database and Jasper Reports for Reporting and deployed to local setup server Jboss

Smartminds Systems Inc | IT Technician / Pogrammer

Apr 2010 - Dec. 2010

I worked as technical support, maintains and troubleshoot server and workstations. Then later promoted to programmer to maintain and enhance existing Visual Basic legacy application.

Freelance Projects

Loan and Financing Application | 2017 - 2018

Developed a loan management system using C# and SQL Server to handle customer records, loan applications, payment schedules, and balance tracking. The system allows users to compute interest, monitor payment history, and generate reports for financial transactions. Designed with a structured database and user-friendly interface for efficient loan processing.

Sales and Inventory Reservation | 2021 - 2022

Built a sales and inventory management system using C# and SQL Server to track products, stock levels, sales transactions, and customer records. The Desktop application includes features for updating inventory automatically after each sale and generating reports for daily and monthly transactions. Designed to improve accuracy and efficiency in store operations.

ERP | 2023 - 2024

Built an ERP Inventory Management System using React to manage products, stock levels, and inventory transactions through a responsive and interactive web interface. The application integrates with ASP.Net Core Rest APIs for real-time data processing and includes features such as stock tracking, reporting, and user role management. Designed with a modular and scalable structure to support growing business requirements.
