Kalunasan Cebu City

EDUCATION

- University of Cebu
  Bachelor of Science in Information Technology
  Completed in 2010

EXPERTISE

- Full-Stack Development
- Enterprise Application Development
- MVC & Clean Architecture Implementation
- Database Design & Performance Optimization
- Financial Systems Development (Loan & Money Transfer)
- Agile & Structured Development Lifecycle

TECH STACK

Backend Development

- C#, ASP.NET Core / MVC / Web Forms
- Visual Basic .Net
- Java
- PHP (CodeIgniter)
- REST APIs & Web Services (SOAP, REST)

Frontend Development

- Blazor (Component-base UI)
- React (Currently upskilling)
- HTML, CSS, JavaScript
- jQuery
- Ext JS

PROFILE

Full Stack Developer with strong experience in designing and implementing API-driven integrations using ASP.NET Core and Blazor. Experienced in building scalable systems that connect multiple business platforms, including carrier and logistics-related services.

Skilled in data mapping, REST API integration, and system architecture design, with hands-on experience handling dynamic workflows across multiple systems. Adept at translating business requirements into technical solutions and optimizing processes through automation.

Eager to leverage integration expertise in logistics and freight systems, with a strong interest in CargoWise and enterprise integration platforms.

WORK EXPERIENCE

Sharpsuite Corporate Solutions | FullStack Software Engineer

September 2024 – Present

- Designed and delivered enterprise-grade **Transport Management System** using **C#**, **ASP.NET Core**, and **SQL Server**, handling full development lifecycle from architecture to deployment.
- Built scalable **REST APIs** integrating multiple third-party systems (logistics/carrier APIs) with resilient error handling and fallback strategies.
- Architected a dynamic multi-carrier quote system using factory pattern, enabling flexible support for API-driven and rule-based providers.
- Developed a custom **HR Portal** featuring employee management, task tracking (**Kanban-style**), and role-based access control to streamline internal operations.
- Implemented secure authentication & authorization (**JWT**, **RBAC**) across systems.
- Created responsive, component-based UI using **Blazor** and **MudBlazor**, improving usability and performance.
- Optimized database performance through efficient **T-SQL queries** and indexing strategies.
- Refactored and modernized legacy components for better scalability and maintainability.
- Implemented **CI/CD** pipelines using **GitHub Actions**, automating build, test, and deployment processes across environments

KEY PROJECTS

Logistics Quote System

- Multi-carrier API + manual computation engine
- Extensible architecture using design patterns

HR Management Portal

- Employee + task management system (Kanban-style)
- Role-based access and admin/user workflows

Full Stack / Frameworks

- ASP.NET Core (Full Stack Development)
- MVC Architecture
- CodeIgniter (Full Stack PHP Framework)

API & Integration

- RESTful APIs
- SOAP Web Services
- External API Integration (Multi-Carrier)
- Open API

Databases & ORM

- Microsoft SQL Server (MSSQL)
- T-SQL (Stored Procedures, Query Optimization)
- MySQL
- Entity Framework Core

Reporting Tools

- Crystal Reports
- T-SQL Server Reporting Services (SSRS)
- Jasper Reports
- DevExpress Reports

DevOps & Tools

- GitHub Actions (CI/CD)

Version Control, Tools & Practices

- GIt (branching, merging, PRs)
- Debugging & Testing
- Visual SVN
- Debugging & Testing
- API Testing (Swagger, Postman)

Cloud & Hosting

- Microsoft Azure
- Plesk

Project Management & Collaboration Tools

- Asana
- ClickUp
- Github Projects

TritonTek | FullStack Software Engineer

Feb. 2023 - July 2024

- Develop Part of a module for **HRIS Job Portal** - For Online employee recruitment with **Blazor** for Frontend and **ASP.Net Core Web API** for Backend.

- Develop a Third Party Desktop Application for Software Integration for Tekla Structures mainly used for both US Clients. Using **C#** Application tool with **Entity Framework**, **OOP Structured ORM repository**, LINQ, Lambda and it uses **Tekla Open API** and **MySQL Database**.

  Both Projects are in **Agile Methodologies** with Sprint, Backlog and Task Tracking

SkyGo Marketing Corporation | FullStack Software Developer

Feb. 2014 - Jan. 2023

- Developed Online Exam Recuitment Project using **PHP Codeigniter** and MySQL

- Develop Online TIcketing Task for Service Employees using **ASP.Net MVC**

- Develop an in-house ERP Project using C# and Asp.Net with Javascript (ExtJs) and MSSQL as Database with SQL Server Reporting Services (SSRS) for Server Side Reporting tool.

MLhuillier Philippines | Programmer / Developer

Oct.2012 - Jan. 2014

- Develop ML Kwarta Padala (Money Transfer), using **Visual Basic .Net** for desktop application with **Web Service (SOAP)** for data transfer and **MySQL** as Database and also **ASP.Net Web Forms** for Online Portal

Rameses Systems Inc | Programmer

Feb. 2011 - Sept. 2012

Develop Loan Application using Java 2EE with MySQL Database and Jasper Reports for Reporting and deployed to local setup server Jboss

Smartminds Systems Inc | IT Technician / Pogrammer

Apr 2010 - Dec. 2010

I worked as technical support, maintains and troubleshoot server and workstations. Then later promoted to programmer to maintain and enhance existing Visual Basic legacy application and SQL Server

Freelance Projects

Loan and Financing Application | FullStack Developer
2017 - 2018

Developed a loan management system using C# and SQL Server to handle customer records, loan applications, payment schedules, and balance tracking. The system allows users to compute interest, monitor payment history, and generate reports for financial transactions. Designed with a structured database and user-friendly interface for efficient loan processing.

Sales and Inventory Reservation | FullStack Developer 2021 - 2022
2021 - 2022

Built a sales and inventory management system using C# and SQL Server to track products, stock levels, sales transactions, and customer records. The Desktop application includes features for updating inventory automatically after each sale and generating reports for daily and monthly transactions. Designed to improve accuracy and efficiency in store operations.

ERP | FullStack Developer
2023 - 2024

Built an ERP Inventory Management System using React to manage products, stock levels, and inventory transactions through a responsive and interactive web interface. The application integrates with ASP.Net Core Rest APIs for real-time data processing and includes features such as stock tracking, reporting, and user role management. Designed with a modular and scalable structure to support growing business requirements.
