474 Sitio Langob Brgy.

Kalunasan Cebu City

EDUCATION

- University of Cebu
  Bachelor of Science in Information Technology
  Completed in 2010

EXPERTISE

- Full-Stack Development
- Enterprise Application Development
- MVC & Clean Architecture Implementation
- Database Design & Performance Optimization
- Financial Systems Development (Loan & Money Transfer)
- Agile & Structured Development Lifecycle

TECH STACK

Programming Languages

- Visual Basic .Net
- C#
- Java
- Php
- Javascript

Frameworks & Libraries

- ASP.NET
  (Web Forms, MVC, Rest API, .NET Core Web Service)
- Blazor
- CodeIgniter
- JQuery
- ExtJS

PROFILE

A Full Stack Developer, I specialize in crafting scalable web applications and seamless system integrations. With a foundation in accounting systems. I bring a unique perspective to software development, enabling efficient automation and process optimization.I enjoy building scalable, maintainable systems that solve real business problems.

WORK EXPERIENCE

Sharpsuite Corporate Solutions | Software Engineer
September 2024 – Present

1.Developed a Freight Management System (Enterprise Web Application) – Architected and led the development of a scalable freight management platform using Blazor Web App (MudBlazor UI) and ASP.NET Core Rest API following clean architecture principles. Designed and implemented RESTful services, JWT-based authentication, carrier-specific business logic (API-integrated and rule-based computation), and repository-pattern data access. Optimized performance, security, and maintainability while integrating multiple freight carriers and managing complex consignment workflows. Leveraged MySQL for robust relational data management and ensured production-ready deployment standards. Deployed to cloud and setup configuration.

2.HR Management Portal (Enterprise Web Application) Architected and developed a full-stack HR Management Portal using Blazor Web App with MudBlazor UI framework for a modern, responsive user interface and ASP.NET Core Rest API for secure and scalable backend services. Designed RESTful APIs to manage employee records, attendance tracking, payroll components, user roles, and HR workflows while implementing JWT-based authentication and role-based access control. Applied clean architecture principles and repository pattern for maintainability and scalability. Utilized MySQL as the relational database to ensure structured data management, transactional integrity, and optimized query performance for enterprise-level HR operations.

TritonTek | Software Engineer
Feb. 2023 - July 2024

1.Develop Part of a module for HRIS Job Portal - For Online employee recruitment with Blazor for Frontend and ASP.Net Core Rest API for Backend.

2. Develop a Third Party Desktop Application for Software Integration for Tekla Structures mainly used for both US Clients. Using C# Application tool with Entity Framework, OOP Structured ORM repository, LINQ, Lambda and it uses Tekla Open API and MySQL Database.

Both Projects are in Agile Methodologies with Sprint, Backlog and Task Tracking

Front-End Technologies

- HTML5
- CSS3
- Bootstrap
- MudBlazor

Databases

- Microsoft SQL Server (MSSQL)
- T-SQL
- MySQL

Reporting Tools

- Crystal Reports
- T-SQL Server Reporting Services (SSRS)
- Jasper Reports

Version Control

- GIt
- Torotoise SVN
- Visual SVN

Cloud & Hosting

- Microsoft Azure
- Plesk

Project Management & Collaboration Tools

- Asana
- ClickUp
- Github Projects

SkyGo Marketing Corporation | FullStack Developer
Feb. 2014 - Jan. 2023

1.Enhanced and Maintain Online Exam Recuitment Project using PHP Codeigniter and MySQL

2.Develop an in-house ERP Project using C# and Asp.Net with Javascript (ExtJs) and MSSQL as Database with SQL Server Reporting Services (SSRS) for Server Side Reporting tool.

MLhuillier Philippines | Programmer / Developer
Oct.2012 - Jan. 2014

Develop ML Kwarta Padala (Money Transfer), using Visual Basic .Net for desktop application with Web Service (SOAP) for data transfer and MySQL as Database and also ASP.Net Web Forms for Online Portal

Rameses Systems Inc | Programmer
Feb. 2011 - Sept. 2012

Develop Loan Application using Java 2EE with MySQL Database and Jasper Reports for Reporting and deployed to local setup server Jboss

Smartminds Systems Inc | IT Technician / Pogrammer
Apr 2010 - Dec. 2010

I worked as technical support, maintains and troubleshoot server and workstations. Then later promoted to programmer to maintain and enhance existing Visual Basic legacy application.

Freelance Projects

Loan and Financing Application | 2017 -2018

Developed a loan management system using C# and SQL Server to handle customer records, loan applications, payment schedules, and balance tracking. The system allows users to compute interest, monitor payment history, and generate reports for financial transactions. Designed with a structured database and user-friendly interface for efficient loan processing.

Sales and Inventory Application | 2021 - 2022

Built a sales and inventory management system using C# and SQL Server to track products, stock levels, sales transactions, and customer records. The application includes features for updating inventory automatically after each sale and generating reports for daily and monthly transactions. Designed to improve accuracy and efficiency in store operations.
